Harvesters Junior FC: future stars excel on newly resurfaced 3G facility by S&C Slatter

“

Due to our **commitment** and **involvement** at every stage, you can be assured of the **finest results**.

Our reputation is **your** guarantee of quality

Over the past 20 years, S&C Slatter has established an excellent reputation for creating sports, play and leisure facilities. Our clients include sports clubs, local authorities, universities, schools and nurseries, who have all benefited from our expertise.

At S&C Slatter, we are proud of being a family business that offers its customers a first-rate service. Since our foundation in 1991 by Steve Slatter; and more recently under the direction of his son, David Slatter, we have always delivered on our promises.

Our dedicated range of services extends from initial consultation and recommendation of construction profiles, surface systems and associated equipment, right through to final hand-over of high quality, sustainable facilities.

In short, we specialise in the creation of sports and leisure installations that offers our clients a turnkey solution. Our comprehensive in-house expertise covers design, construction and maintenance.

Significant internal investment into specialist plant and trained staff ensures critical aspects of the facility are delivered in-house. We take great pride in delivering a first-class service for all aspects of your project.

In addition, our team also handle the construction of many ancillary elements of the project to complete your specific installation, including ball stop fencing, floodlighting, storage facilities, as well as supplying and installing sports and play equipment.

QUALITY

A proven dedication to delivering quality facilities that set the standard for the industry.

Sports Pitch Projects

We create all specifications of sports facilities using the most advanced artificial turfs and durable synthetic surfaces. The range of projects that we undertake extends from mini-ball courts to full-sized sports pitches.

Our projects include specialist installations for dedicated use such as football, cricket, hockey and rugby pitches, while we also create multi-sport facilities that allow a number of different sports or activities to take place on the same surface.

Such versatility is an asset for local authorities and schools who need to maximize the revenue generation potential of their sports and leisure facilities. Our professional installations enable different activities to be scheduled, either at different times of the day or over the course of the year.

As well as the construction of new sports pitches, we have the capability to undertake the resurfacing and refurbishment of existing sporting facilities, renewing and extending a facility's life for the next generation of players.

With our proven expertise, whatever the size and nature of your installation, and whether you require a sport-specific or multi-functional surfaced facility, we have the ideal solution.

SPORTS PITCH INSTALLATIONS

Football – from five-a-side to full-size professional match and training pitches conforming to **FIFA 1 & 2 Star** performance standards

Hockey – All surface systems offered for hockey matches and training, certified to **FIH National & Global and EHF Category 1, 2 & 3** facilities

Cricket – match pitches and practice areas to **ECB compliant** standards

Rugby – Artificial turf systems meeting **RFU and IRB regulation 22** performance standards

Tennis – choice of surfaces for all levels of tennis play and practice to **ITF** performance standards

Multi-sports – hard-wearing and versatile multi-sports surfaces to accommodate five-a-side football, netball, softball, rounders, basketball, as well as sports practice and general games activity, constructed to **Sport England** performance standards

PARTNERING

A company-wide ethos focussed on working with our clients and suppliers to create facilities of quality and pride.

“

We are delighted to have worked with S&C Slatter for the last 10 years. They are a preferred supplier of artificial surfaces and equipment in sport, play and landscape applications due to their high quality workmanship, attention to detail and all-round value for money.

STEVE FOSTER
Outdoor Facilities Officer, Oxfordshire County Council

The **right** surfaces for all kinds of sports

More and more sports clubs, sporting associations, local authorities and schools are discovering the significant advantages that sports installations featuring artificial turf playing surfaces can offer them and their players.

Hockey and tennis were early converts to the practical benefits of artificial surfaces. Modern technological solutions are so advanced that even those sports that were previously reluctant to adopt artificial playing surfaces now realise the major benefits of having hard-wearing, weather resistant sports surfaces.

Football and rugby players need no longer rely on favourable weather conditions to ensure they can participate in their chosen sports. Pitches needn't be rested and constantly repaired when you use our state-of-the-art artificial grass surfaces.

The quality of these modern surfaces means that all manner of sports and games can be played and practised at the highest level, improving standards of sporting achievement.

For S&C Slatter the successful delivery of a quality artificial turf sports, play or leisure facility is the result of a combination of important factors.

By ingraining a company-wide work ethic that is committed to working co-operatively with our clients, we monitor very closely the materials and products utilised on our projects. Key product suppliers are selected following a deliberate and thorough appraisal of quality, reputation and capability.

SYNTHETIC SPORTS SURFACES

- Sand-filled
- Sand-dressed
- 3rd Generation (3G) rubber crumb
- Water-based Elite Hockey
- Polymeric surfaces
- Acrylic Coated surfaces
- Colour Coated Macadam

We are the **cricket** professionals

Having been consistently at the forefront of the installation of non-turf cricket surfaces, S&C Slatter is the UK's leading specialist in the construction of synthetic turf match pitches and practice facilities approved by the England and Wales Cricket Board (ECB).

Thanks to over 20 years experience in the installation of synthetic cricket facilities, and as distributors for the market-leading **Notts Sport™ Cricket Systems**, we are able to offer a professional choice of fully ECB-approved base systems and surfaces.

Our experience enables us to offer practical advice and assistance from the very start of your project, including full site surveys, design process and planning procedures, as well as and information on potential grant aid, where applicable.

Your choice of a non-turf cricket system should reflect your particular requirements, as well as the type and amount of use that the surface will need to support.

We always review and discuss with you the wider picture, taking into account the age and ability of the end-users, your overall performance requirements, site security and maintenance capacity.

Only then will we offer you the specification options that best match your individual needs and circumstances.

CRICKET SERVICES INCLUDE:

- New-build match pitches and practice areas to **ECB** performance specifications
- Specialist advice on base systems and surfaces
- Low maintenance surrounds/cage in-fills
- Cage and netting systems
- Perimeter and/or security fencing options

- Extensions to the facility allowing wicket-keeper or fielding practice
- Specialist options including anti-rodent netting protection, sight-screening and power-points for bowling machines
- Maintenance, refurbishment and resurface of existing facilities
- Roll-down indoor and outdoor mats

“

We have a wide range of sports surfaces and facilities in a number of different locations across the Borough, which have been installed by S&C Slatter. They have also provided us a comprehensive installation and maintenance service and our officers have been pleased to recommend their services to other authorities and schools when asked.

LYNNE REYNOLDS,
Reading Borough Council.

Over 20 years
of experience in
artificial surface
development for
sport and play.

Multi-Use Games Areas

The clear commercial and social benefits of community sports facilities have long been known. Many schools, universities and local authorities have taken advantage of the variety of surface technologies available for Multi-Use Games Areas (MUGAs).

The installations that we design and construct are highly versatile spaces, enabling a wide variety of sports and leisure activities to take place on the same surfaces or adjoining sections.

Now, all manner of sports can take place on the same surface, throughout the year and whatever the weather.

For example, such hard-wearing surfaces can accommodate a mix of football, tennis, hockey, softball, rounders, basketball, etc, as well as training, practice and general games activity.

Spaces that feature artificial turf and synthetic surfaces can also provide excellent leisure and socialising facilities, providing ideal locations for social interaction at all times of the year.

Whether you require a multi-use games and play area for young children or a versatile space where adults can socialise or play a variety of sports, we can create the ideal solution.

CONSTRUCTION OF MULTI-USE GAMES AREAS (MUGA)

Sport England Type 1 and 2 macadam/colour coated multi-sport facilities

Sport England Type 3 and 4 Polymeric surfaced multi-sport facilities

Sport England Type 5 synthetic turf pitch facilities

Mini-football facilities

Tennis and netball courts

Spaces for social interaction

SPORT

A truly turnkey solution for the construction of **Artificial Turf Sports Pitches** and **Multi-Use Games Areas**.

University of Portsmouth 1st XI winning on their newly resurfaced GreenFields elite sand dressed hockey pitch

Resurfacing and **Refurbishment**

Artificial Turf Pitches (ATPs) first became popular in the UK during the 1970s and have increased in popularity ever since. With over 20 years experience in this field, S&C Slatter is ideally placed to offer advice on upgrading and refurbishing existing facilities.

By gaining a thorough understanding of your existing artificial pitch we can establish the most cost-effective solution for a successful refurbishment and maintenance programme.

Artificial Turf Pitches and Multi-Use Games Areas (MUGAs) can often be resurfaced and upgraded without the need for the complete replacement of the existing shock-pads or sub-base layers.

There are a number of other ways in which we can help you achieve significant cost savings. For example, resurfacing projects do not necessarily mean that the existing artificial turf should be replaced with like-for-like surfaces; alternative surfaces may now more accurately reflect the dominant user requirements and performance standards required.

At times it can be appropriate to upgrade existing tarmac or concrete areas, resurface areas with a new hard-wearing artificial turf system, or even remove those

hard play areas and install new specialist surfaces using the latest selection of play surface systems.

By employing our professional advisory services you can be assured of receiving accurate information, an honest appraisal and the most cost-effective, practical solutions.

RESURFACING AND REFURBISHMENT SERVICES INCLUDE:

Resurfacing of existing ATPs and MUGAs with like-for-like or upgraded surfaces

Repairs and maintenance of existing surfaces

Specialist contract installation of synthetic turf, infill and playing lines

Polymeric runways and landing areas for athletics field sports

“

The school have been delighted with the services provided by S&C Slatter. They do what they say they do, and when they say they will; inclusion of their maintenance service is just great, one less thing to worry about.

MARY WATTS
Head Teacher, Appleton Primary School

PLAY & LEISURE

Solutions for all types of play areas, leisure and landscape requirements.

Play and Leisure

When it comes to play and leisure, we provide surfaces and structures that create secure and inclusive spaces to enhance children's play and learning.

Our specialist advisers ensure that you make the most of your available space and budget, while also minimising any future maintenance requirements.

The creative use of artificial surfaces in sport, landscaping and general recreational play can assist children's physical and mental development, as well as supporting elements of the educational curriculum.

S&C Slatter are experts in the installation of multi-functional play spaces for free-play time or the organised delivery of Physical Education. Large or small, flat or contoured, these recreational and physical education areas can promote exercise, play and learning within a safer environment.

By including letters, numbers, shapes and contours within the surface of your junior play areas, you can aid the development of skills in literacy, numeracy, reasoning and problem-solving.

We also design and construct creative play areas for schools and local authorities containing suitable play equipment, from traditional slides and swings to some highly adventurous installations. For example, we have even created a playground with a large pirate ship at its

centre for children to explore at Woodstock Primary School, Oxfordshire.

In addition to creating spaces for play and education, our hard-wearing yet cushioned surfaces can provide ideal places where people of all ages can relax and socialise. The all-weather advantages of artificial turf and rubber surfaces make them suitable for so many applications, even in shaded areas.

PLAY AND LEISURE SERVICES INCLUDE:

Synthetic surfaces for sport, landscaping and recreational play

Creative play and learning environments

Play structures and Trim Trail equipment

Impact-absorbing surfaces

Outdoor classrooms

Shade and shelter

Active adventure trails

Spaces for social interaction

“

We find S&C Slatter Ltd to be a very good organisation to do business with, always co-operative, friendly and efficient in their contract execution.

KEVIN MIST

Head of Leisure Services,

Royal Borough of Windsor & Maidenhead

From **concept** through to care

During the past 20 years, S&C Slatter has acquired extensive experience in the installation of sports facilities and play areas featuring artificial surfaces.

In this time we have developed considerable in-house capabilities and technical resources. This means that our highly-trained personnel are able to undertake all aspects of your project, from initial consultation through design to final installation and ongoing maintenance.

Whether it's a mini-ball court or a full-sized sports pitch, we offer practical and expert advice on the selection of surface and performance control layers including sand-filled, sand-dressed or 3G systems.

Whatever the project, you can be confident that S&C Slatter is able to provide a total package, including all ancillary items such as fencing, floodlighting, sports equipment and landscaping.

In addition to new-build installations of all types, we can offer you a **regular maintenance regime** to ensure the **long-term quality** of any facility.

Whether you have a new facility that requires on-going maintenance, or an existing synthetic sports surface that needs a new lease of life, we are always pleased to help.

OUR MAINTENANCE SERVICES INCLUDE:

- Free site survey and report
- Experienced in-house teams for all aspects of maintenance
- Maintenance contracts for weekly, monthly or quarterly visits
- Drag brushing, power brushing and grooming
- Chemical treatments for algae and weed management
- Infill levels management
- Seams and joint repairs
- Line marking
