

## Case Study

# Queen Ethelburga's Collegiate

3G Artificial Turf Pitches for Rugby and Football

Water-based Artificial Turf Pitch for Hockey

Artificial Turf Work Out Area

Queen Ethelburga's Collegiate Foundation comprises four schools and a kindergarten, each with its unique qualities, but all sharing a common purpose of providing students with a first class education and the opportunity to work towards higher education and a successful career.

The Thorpe Underwood Estate selected S&C Slatter to work in close partnership on the development of the College's sports pitch facilities. In this extensive new build project, nearly 38000m<sup>2</sup> of artificial turf has been installed in providing five new sports pitches and a work out area.

A high quality 60mm 3G artificial turf provides a total of four Rugby and Football pitches for Senior and Junior players, while an 18mm Water-based artificial turf features on the new hockey pitch which meets the FIH Global standard.

Client: Queen Ethelburga's Collegiate

Facility: 3no 3G Artificial Turf Pitches for Rugby and Football. 25728m<sup>2</sup>

3G Artificial Turf Pitch for Rugby. 4240m<sup>2</sup>

Water-based Artificial Turf Pitch for Hockey. 6388m<sup>2</sup>

Artificial Turf Work Out Area. 1600m<sup>2</sup>

Rugby and Football Artificial Turf Pitches certified to FIFA 1 Star and World Rugby Regulation 22 Performance Standards

Hockey Artificial Turf Pitch certified to FIH Global Performance Standard

Complete with in-laid lines and pitch equipment

“ The pitches installed by S&C Slatter are performing brilliantly. The service and installation was similarly excellent and I would gladly recommend the company.”
