For Optimum Surface Quality and Performance

## **Free** Artificial Sports Pitch Review

- ✓ Free on-site consultation
- ✓ Expert review and assessment
- ✓ No obligation written report

## Why your artificial sports pitch has to perform

The capital cost of installing an artificial sports pitch represents a significant investment. It is therefore vital for it to achieve and retain the specified performance levels on a continuous basis. The quality of play, the longevity of the facility and indeed the reputation of the school, may equally be impacted if the required standards are not being maintained.

The safety of players can of course also be compromised if a pitch is not performing as it should.

**Does your pitch still deliver the performance standard it was constructed to achieve?**

### Inadequate maintenance is a common failure

It has been recognised that a common reason for the failure to perform with an artificial sports pitch is inadequate maintenance. Accordingly sport governing authorities strongly recommend that pitch owners seek the advice of a suitable maintenance specialist to assess and advise on their facility.

### Free Artificial Sports Pitch Review

We are offering a **FREE** On-Site Consultation to assess the condition of your artificial sports pitch. You will receive a no obligation written report highlighting pitch performance and recommendations for improvements and maintenance.

## Our reputation is your guarantee

S&C Slatter has over 25 years' experience as specialists in the design, construction and maintenance of artificial sports facilities. We deliver projects in-house and have an established reputation for quality.

We continually invest in a fleet of state of the art artificial sports pitch maintenance machinery. We understand the importance of using the right equipment for any given task and our investment ensures we can address any maintenance challenges presented by your facility.

### Our services include:

- Artificial Pitch Maintenance contracts for Weekly, Monthly or Quarterly Visits
- Drag Brushing
- Grooming
- Chemical Treatments for Algae and Weed Management
- Power Brushing
- Infill Levels Management
